

Pair activity- interviews

Grade Level- senior high/upper junior high

Activity- students think of questions to ask another student in their class. I told them they couldn't write DO or ARE questions (yes or no) because the answers are boring. We discussed question words briefly. After writing the questions, students interviewed each other using the LL headphones (or you can just put them in pairs randomly). After the interview, they wrote a paragraph about that person.

You are writing an article for the **newspaper** about another student in your class.

You will interview your partner and write a story about them.

Make a list of 10 questions that you want to ask them about themselves.
